

Wireless Video Anywhere NOW

Motion Sensor
0 lux digital camera
Infrared Illuminators

- **Copper Theft**
- **Construction Sites**
- **Remote Infrastructure**

Deploy a video security system anywhere NOW. Self-powered system delivers video of intrusion over the cell phone network! Secure 128 bit AES encryption.

**Night Vision
Camera/Motion Sensor**

Self-Powered: no A/C connection
128 bit AES encrypted
25 Channel Spread Spectrum
2-way wireless transceiver

VIDEO SECURITY: No Power, No Wires, No Waiting

Videofied delivers a 10 second video of what caused the alarm to a Command Center, Monitoring Station or Notification List. When the motion sensor detects an intruder it activates the night-vision camera and compresses the 10 second video into an encrypted 200K MPEG file that is immediately delivered where it is needed. No A/C power or other wires make immediate deployment discreet and clean. The Videofied control module communicates over the GPRS cell network as well as Ethernet or standard telephone.

Mission critical security now - Get Videofied.
